DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 9, 10, and 13, drawn to an apparatus for converting thermal energy of an internal combustion engine to another energy using pressure bottles.

Group II, claim(s) 12, 19-21, and 23-31, drawn to an apparatus for converting thermal energy to another energy using a hydraulic lifting apparatus or torque-storing apparatus.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of the Group I invention is the thermal input of the internal combustion engine stored as pressurized hydraulic liquid in the pressure bottles claimed therein which is not present in Group II. The special technical feature of the Group II invention is the specific claimed structure of the thermal input stored as potential energy in the hydraulic lifting apparatus or torque-storing apparatus which is not present in Group I.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
